Q7. What was good about the TA?

1. .
2. Cantonese speakers, which is easier for me as a local student to approach.
3. Good attitude to teach

Q8. How might the TA improve?

1. .
2. /
3. The attitude of this TA is poor. He is not willing to help students.
4. You do not need to argue with any student who is problematic, the attitude shows that the personality and he need to bear the consequences when he is outside, say in workplace. Please focus on students who are really enthusiastic in Fluid mechanics or they have good altitude. Never waste you or students' time due to fairness.
5. a bit nervous

[^] Explanatory notes on adjusted percentage, mean and SD (collectively referred to as "adjusted statistics" below):

1. Adjusted statistics are calculated to provide a reference with extreme responses being excluded.
2. If a survey recorded 3 or more responses, the top 1.5% AND bottom 1.5% responses will be discarded. The number of discarded response(s) of each end is rounded UP to the nearest integer. The resultant data set will then be used to calculate adjusted statistics in this report.
3. Adjusted statistics will be provided up to course level if and only if they meet the following conditions:

Level of adjusted statistics	Conditions
Survey level	The survey receives 3 or more responses.
Section level	(1) All surveys receive 3 or more responses; AND (2) This section is taught by One teaching staff only (instructor / TA).
Course level	(1) All surveys receive 3 or more responses; AND (2) This course is taught by One teaching staff only (instructor / TA).

If no adjusted statistics is provided, it will be marked as "-" in this report.
