Q7. What was good about the TA?

- .
- /
- Explain things and concepts very clearly, good interactions with class
- Explain things clearly and really helpful
- Extremely knowledgeable and works very hard to make sure we understand concepts and problems, I give him 11 stars out of 10
- He explains the concepts very clearly with a lot of examples.
- He explains the force and the truss in detail and clearly.
- His teaching is passionate and energetic. The teaching approach is very good
- Very clear voice. That allows me to focus more on the tutorial.
- Very good TA, provided alternative ways to solve the questions
- explain the content clearly

Q8. How might the TA improve?

- .
- /(2)
- Not the TA's fault, but there are rude people sitting in tutorial who talk sometimes and it's difficult to hear. Other than using a microphone and turning up the volume to drown out the chatter, I don't know what else to do.
- Should teach more sessions

^ Explanatory notes on adjusted percentage, mean and SD (collectively referred to as "adjusted statistics" below):

- Adjusted statistics are calculated to provide a reference with extreme responses being excluded.
- If a survey recorded 3 or more responses, the top 1.5% AND bottom 1.5% responses will be discarded. The number of discarded response(s) of each end is rounded UP to the nearest integer. The resultant data set will then be used to calculate adjusted statistics in this report.
- Adjusted statistics will be provided up to course level if and only if they meet the following conditions:

Level of adjusted statistics	Conditions
Survey level	The survey receives 3 or more responses.
Section level	(1) All surveys receive 3 or more responses; AND

	(2) This section is taught by One teaching staff only (instructor / TA).
Course level	(1) All surveys receive 3 or more responses; AND
	(2) This course is taught by One teaching staff only (instructor / TA).

If no adjusted statistics is provided, it will be marked as "-" in this report.
